2017 National Farm Safety and Health Week US Ag Centers Social Media Kit

September 17-23, 2017 "Putting Farm Safety Into Practice" #USAGCenters #NFSHW #NECASAG

The U.S. Agricultural Centers are promoting the 2017 National Farm Safety and Health Week through social media. This social media kit has been developed to promote U.S. Ag Center YouTube videos and other safety resources that fit with the daily themes of National Farm Safety and Health Week.

Daily Themes

Monday- Tractor Safety (with an emphasis on the ROPS rebate program)

Tuesday – Farmer Health

Wednesday – Child/Youth Ag Health and Safety

Thursday – Confined Spaces in Agriculture

Friday- Rural Roadway Safety

Event Promotion

- Update your website and Facebook cover photo with the National Farm Safety and Health Week graphic.
- During National Farm Safety and Health Week, post the social media messages found on the following pages, or create your own posts using the hashtags #NFSHW and #USAgCenters. Other hashtags may also be appropriate.
- Get involved in the conversation. Follow, RT and share with Twitter and Facebook accounts that message about National Farm Safety and Health Week.

Hashtags

Always use red hashtags

#USAgCenters
#NFSHW
#necasag
#farmsafetyfirst
#confinedspace

#tractorsafety #roadwaysafety

#sharetheroad

#SMV

#noextrariders

Social Media Tips

- 1. Post consistently. Determine what your posting schedule will be and stick to it. Schedule posts ahead of time, if needed. Three tools available for scheduling your social media posts are listed below.
 - a. HootSuite: <u>hootsuite.com/</u>b. Klout: klout.com/home
 - c. FutureTweets: futuretweets.com/
- 2. Post images and/or videos with your messages.
- 3. It's OK to share content from other organizations. Some recommended ratios are below.
 - a. **4-1-1** 4 pieces of content from others, 1 reshare, 1 self-serving post
 - b. 5-3-2 5 pieces of content from others, 3 from you, 2 personal updates
 - c. Golden Ratio 60% others' content, 30% your content, 10% promotional
 - d. Rule of Thirds -1/3 posts about you, 1/3 curated content, 1/3 conversations
- 4. Practice the "Three A's".
 - a. Appreciation
 - b. Advocacy
 - c. Appeals
- 5. Tell stories to humanize the daily topics. Use news articles or personal anecdotes to appeal to the audience's emotional side.
- 6. Ask questions in your posts. Start a conversation.
- 7. Leave your audience with cliff hangers at the end of the day. (i.e., "Stay tuned tomorrow to learn how to keep your kids safe on the farm.")
- 8. Refer to the infographic on page 5 for peak times for posting.

Tractor Safety (emphasis on ROPS)

Monday, 9/18/17

- Tractors are the leading cause of death on the farm. These videos highlight the dangers of tractors: <u>bit.ly/FatalRollover</u>; <u>bit.ly/WisconsinROPS</u> #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 80% of deaths caused by rollovers happen to experienced farmers.
 http://bit.ly/FatalRollover #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 1 in 7 farmers involved in a tractor rollover is permanently disabled. Learn more about AgrAbility: <u>bit.ly/KYAgrAbility</u> #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 4. Rollover Protective Structures (ROPS) are 99% effective in preventing injury or death in the event of an overturn when used with a seatbelt.

 bit.ly/MultiStateROPS
 #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 5. Roughly ½ of US tractors do not have rollover protection. Learn how to retrofit your tractor: bit.ly/MultiStateROPS #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 6. 7 out of 10 farms will go out of business within five years of a tractor overturn fatality. bit.ly/FatalRollover #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 7. Through the National ROPS Rebate
 Program the average out-of-pocket
 expense for a ROPS kit is \$391. Check it
 out at bit.ly/MultiStateROPS.
 #USAgCenters #NFSHW #necasag
 #farmsafetyfirst
- 8. In the winter of 2005, an 84 year old

- Tractors are the leading cause of death on the farm. <u>bit.ly/FatalRollover</u> #USAgCenters #NFSHW
- 80% of deaths caused by rollovers happen to experienced farmers.
 <u>bit.ly/FatalRollover</u> #USAgCenters #NFSHW
- 3. 1 in 7 farmers involved in a tractor rollover is permanently disabled.

 <u>bit.ly/KYAgrAbility</u> #USAgCenters #NFSHW

Child/Youth Ag Health and Safety

Wednesday, 9/20/17

facebook

- Every 3 days, a child dies in an agriculture-related incident. Learn about one family's tragedy and avoid your own: bit.ly/GrowingSafely.
 #USAgCenters #NFSHW #necasag #farmsafetyfirst
- Machinery, vehicles-including ATVS, and drownings are the leading sources of youth fatalities in agriculture. <u>bit.ly/ChildAgInjuries</u>. #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 3. Animals are the leading source of injury for kids who live on farms.

 Learn how to respect livestock with this fun video: bit.ly/LivestockSafetyKids
 #USAgCenters #NFSHW #necasag
 #farmsafetyfirst
- 4. About 40,000 kids under the age of 16 are treated in U.S. emergency departments for ATV related injuries each year. Know more:

 bit.ly/ATVproducts
 #USAgCenters
 #NFSHW #necasag #farmsafetyfirst
- It's easier to bury a tradition than a child. bit.ly/KeepKidsAway
 #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 6. Is your child ready to help on the farm? Check out the Youth Work Guidelines to learn about age appropriate tasks: <u>bit.ly/YouthWorkGuide</u>. #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 7. Keeping young children out of the farm worksite saves lives. Learn how to create safe play areas on the farm:
 bit.ly/SafePlayArea. #USAgCenters
 #NFSHW #necasag #farmsafetyfirst
- 8. It is best to assume that your animals

- Every 3 days, a child dies in an agrelated incident. Hear one family's story at bit.ly/GrowingSafely.
 #USAgCenters #NFSHW
- 2. Machinery, vehicles & drownings are the top sources of youth fatalities in ag. bit.ly/ChildAgInjuries. #USAgCenters #NFSHW
- Teach kids to respect livestock with this fun video: <u>bit.ly/LivestockSafetyKids</u>. #USAgCenters #NFSHW
- Most ATVs are not designed for your child to drive. Know more: <u>bit.ly/ATVproducts</u>. #USAgCenters #NFSHW
- It's easier to bury a tradition than a child. <u>bit.ly/KeepKidsAway</u> #USAgCenters #NFSHW
- 6. Is your child ready to help on the farm? Check the Youth Work Guidelines: bit.ly/YouthWorkGuide. #USAgCenters #NFSHW
- 7. Learn how to create safe play areas on the farm: bit.ly/SafePlayArea. It can save your child's life. #USAgCenters #NFSHW
- 8. It is best to assume that your animals have germs that can make you sick.
 Read Leo's story: bit.ly/EcoliLeo.
 #USAgCenters #NFSHW
- E.coli struck twice in one family with tragic results: bit.ly/EcoliSiblings.
 Always wash your hands!
 #USAgCenters #NFSHW
- 10. Farms, fairs and fun: Be sure to wash your hands! This video is fun and informative. bit.ly/FarmWashHands #USAgCenters #NFSHW

- have germs that can make you sick. Read Leo's story: <u>bit.ly/EcoliLeo</u>. #USAgCenters #NFSHW #necasag #farmsafetyfirst
- E.coli struck twice in one family with tragic results: <u>bit.ly/EcoliSiblings</u>. Always wash your hands! #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 10. Farms, fairs and fun: Be sure to wash your hands! This video is fun and informative. bit.ly/FarmWashHands #USAgCenters #NFSHW #necasag #farmsafetyfirst
- 11. Clinicians, learn about pediatric asthma and the 6 components of modern asthma management for children.

 Online course is designed for the busy clinician, including physicians, physician assistants, mid-level providers, nurses, nurse practitioners and public health educators.

 bit.ly/pedasthma #USAgCenters #NFSHW #necasag #farmsafetyfirst

11. Physicians, public health educators, earn CME credit, learn about Pediatric Asthma & Environmental Exposures. bit.ly/pedasthma #NFSHW

Interview Guides

If you are asked to do a radio or television interview, you can use the talking points below.

These are only suggestions. Feel free to compose your own notes.

Remember these interview tips:

- Keep your answers short and to the point.
- Prepare your answers ahead of time.
- Provide instructions on how to access resources, like the joint Ag Centers' YouTube channel.
- Mention the name of the campaign, the organizers and the Ag Centers.

Monday: Tractor Safety

Did you know that most agricultural fatalities are caused by tractor overturns? Overturns occur under numerous conditions. Improperly hitched equipment, soft shoulders or deep impressions in the field, steep embankments, or using the tractor to pull heavy objects like tree stumps. Make sure your tractor is equipped with a roll bar or cab and wear your seat belt. The roll bar is not going to save your life if you are not buckled into the safety zone. Buckle up! Many states have ROPS Retrofit Programs now that allow you to add a rollbar and seatbelt to your tractor at a discounted cost. Check out www.ropsr4u.com to learn more.

Chances are you are not the only person who operates equipment on your farm or ranch. If you won't invest in your own safety, invest in the safety of your family and employees. Invest in safety. It's worth it!

More safety information is available from the U.S. Agricultural Safety and Health Centers. There are 11 Centers located across the country to promote the health and safety of agricultural, forestry and commercial fishing workers. Find the Center closest to you by entering NIOSH Ag Centers in your search engine.

Tuesday: Farmer Health

Working in agriculture can be hard on the body and mind. Agricultural, forestry and commercial fishing workers are constantly subjected to the elements and rarely get a day off. They are exposed to loud machinery, hazardous chemicals, dusty environments, temperamental livestock, and stressful situations. These workers often neglect their own health in order to get the job done. However, the work cannot get done, if the owner/operator or workers are sick and injured. It pays to prevent injuries and illnesses by taking care of your health, managing chronic issues like diabetes and high blood pressure, and ensuring the workplace is designed with safety in mind.

The success of the business is dependent not only on the productivity of the workers, but also the weather and market—variables that are completely out of the operator's control. For these reasons, the suicide rate for farmers is 60% higher than for non-farmers. It is imperative that agricultural, forestry and fishing owners, operators and workers discuss their concerns with loved ones or a professional. The work simply cannot get done without you. In fact, the entire operation frequently fails after the death of the owner.

More safety information is available from the U.S. Agricultural Safety and Health Centers. There are 11 Centers located across the country to promote the health and safety of agricultural, forestry and commercial fishing workers. Find the Center closest to you by entering NIOSH Ag Centers in your search engine.

Wednesday: Children's Health and Safety

Agricultural operations are unique in that the home and workplace are frequently on the same property. Growing up on a farm or ranch definitely has its advantages, but it is also riddled with risks. It is up to the parents to make wise decisions about the tasks assigned to children. There are many jobs on the farm that children can perform safely. The updated Youth Work Guidelines available from the National Children's Center for Rural and Agricultural Health and Safety is a practical tool for parents to use in assessing child readiness. For younger children, design a safe play area separate from the worksite and supervise their activities.

Wonderful resources are also available from the U.S. Agricultural Safety and Health Centers. Visit YouTube.com/usagcenters for health and safety videos on equipment safety and child development.

Thursday: Confined Spaces in Agriculture

Grain bins, grain wagons and manure pits are all considered confined spaces where the environment is not suitable for human occupancy. Sometimes, it is necessary to enter a grain bin to break up out-of-condition grain. Safety harnesses are available to prevent grain engulfment. However, more than 900 cases of grain engulfment have been reported in the last 50 years. It only takes 5 seconds for a person to be entrapped in flowing grain to the point where they cannot free themselves. A person can be engulfed in a grain bin in less than a minute. Don't become a statistic! Take the necessary steps and time to be safe with confined space.

Visit YouTube.com/usagcenters for health and safety videos on grain bin entry procedures.

Friday: Rural Roadway Safety

Each year accidents involving tractors and other farm machinery occur on rural roads. The National Safety Council estimates that 15,000 collisions involving farm vehicles happen every year. Although, only 19% of Americans live in rural areas, 55% of highway deaths occur on roads that are considered rural. Nearly half of all incidents between motorists and farm implements involve either a left hand turn or a rear-end collision. As you would expect, these collisions follow seasonal trends coinciding with planting and harvesting and are most likely to occur between 3:00-6:00 pm. Tractor operators need to ensure they have a clean SMV (slow moving vehicle) emblem on the back of their tractor and implement. They also need to use

appropriate hand signals and install lighting according to their state laws. Motorists need to exercise patience and understanding. The bottom line is we all have to share the road.
