Welcome!!!

• 1 of a 6-part series

• Brought to you by the University of Minnesota - Women in Ag Network with funding from UMASH

• Format 45-60 Minute Presentation & 30 Minute Question and Answer Segment

Webinar Logistics

• You are in “listen only” mode (muted) during the webinar.

• A recording of this presentation will be made available on the American Agri-Women (AAW) website: www.americanagriwomen.org

• If you are having technical difficulties during the webinar you may ask a question and our moderator will do her best to assist you.

Webinar Logistics

• A survey will launch after the webinar. We appreciate your feedback.

• Please use the “Question” area on your control panel to post a question at any time during the presentation. Questions will be selected and responded to at the end of the presentation.
About Brenda Mack

- Grew up in farm family in East Grand Forks, MN
- Married to a third-generation crop farmer (soybeans, wheat & sugar beets) and we live on the family farmstead
- Licensed Mental Health Profession in MN-21 years experience providing therapy and crisis response services in a farm community
- Assistant Professor in Social Work at Bemidji State University
- Doctoral Student at the University of St. Thomas, St. Paul, MN, on track to graduate in May 2020
- Stress, Burnout and Self-Care Researcher, Consultant and Presenter

About Shauna Reitmeier

- Raised on the family farm in Crookston, MN.
- Helped every summer in the fields until I moved.
- Social Worker, Mental Health and Substance Use Disorder Advocate
- Passionate about Rural and Frontier farmers and increasing access to services

Before We Begin Together

- Brenda and Shauna use their experience and background as guides. Each of you are experts in your own lives and your input will help us tailor content that is relevant to you.
- Some topics may bring up thoughts or feelings that you may not have been prepared to address, resources will be provided for you to seek assistance if needed.
- The information presented is not intended to be treatment.
- We look forward to walking this journey together and learning from you.
Why are we talking about this now?

- Commodity prices
- Highest "business" with death by suicide in US
- Wearing Multiple Hats
- Keeping ALL the Balls in the Air
- Weather
- Regulations
- Farm Transition
- Competition for rental costs
- Health Insurance
- Marital Difficulties
- Intergenerational conflict

Stress

- What is your definition of farming or ranching related stress?
- What are your unique farming or ranching challenges or difficulties that cause you to excessively worry?

Stress Defined

- "Stress is a fact of nature in which forces from the inside or outside world affect the individual, either one's emotional or physical well being, or both. The individual responds to stress in ways that affect the individual, as well as their environment. Due to the overabundance of stress in our modern lives, we usually think of stress as a negative experience, but from a biological point of view, stress can be a neutral, negative, or positive experience" (https://www.medicinenet.com/stress/article.htm)

Agri-Women Stress Research

- "Stress among farm women is related to a complex set of factors encompassing the extent of farm and home roles; role conflict between farm and home roles, and the presence or absence of support from significant others" (Berkowitz & Perkins, 1984, p. 163)

Is Stress Positive or Negative?

Remember...it can be both
Positive Stress

• Stress is positive when it provides opportunities with good outcome, helps with motivation, completing tasks.
  – Surge of energy to be able to fill in driving beet truck during harvest
  – Filling out state and federal loan and grant applications by the due dates
  – Making sure the milking is done before the truck comes to haul

Negative Stress

• Stress is negative if it is seen as a threat or the outcome poor.
  – Dreading a meeting with your banker after a financially difficult year or with the land owner you are renting from who wants to raise rent for next year
  – Avoid talking or communicating with your husband because you are both so overwhelmed with the workload on the farm/ranch and you grow distant and bitter toward each other

What does negative stress look like?

• Insomnia
• Mood Changes
• Unable to make decisions
• Distracted
• Physical Appearance Changes
• Withdraw from others
• Feelings of Hopelessness
• Increased alcohol use

Do you know when stress may not be working for you anymore?

• Good 1st step = Self-Awareness
• Next Steps = Implementing Healthy Coping Strategies
• Seek help if it’s challenging to take self motivated action.

Coping with Stress—The Basics

• Healthy Eating
• Drinking Water
• Sleeping
• Strong, supportive relationships
• Positive Self-Talk
• Self-Care strategies and apps (preview for the next webinar)
• Effectively coping with negative stress can help you think more clearly, feel happier & have more energy to support others, like your spouse or children
Coping with Stress—Help is Available

- More Individual Strategies (i.e.: Breathing to Calm Down, 3 Good Things, Gratitude Journal)—Focus of the 2nd Webinar
- Informal Supports (friends, family, pastor)
- Formal Supports (physician, counselor)
- When is it time to reaching out for help beyond family and friends?

Linking the Series Together

- December 14, 2018
  The Impact of Farming and Ranching Stress for Women 101
- January 11, 2018
