

## Wellness and Safety Pavilion at 2019 Minnesota Farmfest: August 6-8, 2019

---

Farm Bureau Financial Services and Upper Midwest Agricultural Safety and Health Center (UMASH) have collaborated to bring the Wellness and Safety Pavilion to the attendees of Minnesota Farmfest to provide up to date safety and health information for farmers, farm workers and their families in an effort to prevent and/or reduce injuries and illness on farms. Learn more by visiting the exhibitors, taking part in health screenings and seeing live farm safety demonstrations.

UMASH is a collaboration of five leading research and health care institutions working to improve the health and safety of agricultural workers and their families in the Upper Midwest. UMASH is housed out of the University of Minnesota School of Public Health

Agriculture ranks among the **most hazardous industries** according to the National Institute for Occupational Safety and Health. Farmers are at very high risk for fatal and nonfatal injuries; and farming is one of the few industries in which family members (who often share the work and live on the premises) are also at risk for fatal and nonfatal injuries.

Join us in promoting the new **Wellness and Safety Pavilion** at IDEAg's Farmfest sponsored by **Farm Bureau Financial Services** and Upper Midwest Agricultural Safety and Health Center (**UMASH**). Additional support from the Minnesota Department of Health and the Minnesota Department of Agriculture.

**25+** organizations and programs have been recruited to

- Provide safety and rescue **demos**
- Health and safety **education**
- Free, convenient **health screenings**

### HOW TO PARTICIPATE:

**Connect with the participating organizations.**

**Use this kit to share social media messages.**

**Go live to talk about your engagement in the Pavilion, share a press release**

## Wellness and Safety Pavilion at 2019 Minnesota Farmfest: August 6-8, 2019

---

### LIVE DEMOS

#### PTO Safety Demo

Demonstrator: Mike Cruse  
Extension Educator, University of Minnesota Extension

A PTO shaft rotates much faster than our reaction time. Learn about the hazards of the power take-off. Watch what happens when a PTO entanglement occurs. Understand prevention steps to reduce the risk of a PTO-related entanglement.

#### ATV Simulator Demo

Demonstrator: Bernard Geschke  
Program Specialist, Progressive Agriculture Foundation

*The ATV Simulator is a full size ATV mounted on hydraulics that is used to demonstrate the basics of ATV safety including: determining the correct size ATV for a particular rider, choosing the correct personal protective equipment, understanding the risks associated with ATV use and planning on how to prevent ATV accidents and fatalities.*

#### Grain Bin Rescue Demo

Demonstrator: Jim Zwaschka  
Instructor, South Central College  
Station Captain, North Mankato Fire Department

*Using a simulated grain bin engulfment, rescue techniques will be demonstrated to safely retrieve a victim from grain engulfment. Attendees will learn best practice prevention strategies to avoid entrapment or other injury when working around grain bins and how to respond if faced with a grain engulfment situation.*
