60% Of household youth were not working when they were injured in agriculture.

### Population at Risk

**Farms**
- In 2018, there were approximately 2.03 million farms in the United States.¹

**Children**
- About 893,000 youth lived on farms in 2014 and more than half (51%) worked on their farm.²
- More than 265,600 non-resident youth were hired in agriculture in 2014.²
- Approximately 23,883,000 youth visited farms in 2014.²

### Fatal Childhood Agricultural Injuries

**All Youth**
- A child dies in an agriculture-related incident about every 3 days.*
- Of the leading sources of fatalities among all youth, 47% involved transportation (including tractors), 20% involved contact with machinery, and 13% involved violent contact with animals and other humans.³
- Youth under age 16 have 12 times the risk of ATV injuries compared to adults.⁴

**Working Youth**
- From 2001 to 2015, 48% of all fatal injuries to young workers occurred in agriculture.⁵
- Since 2009, youth worker fatalities in agriculture has exceeded all other industries combined.⁵
- In 2016, young workers were 7.8 times more likely to be fatally injured in agriculture when compared to all other industries combined (14.57 per 100,000 FTE vs 1.87 per 100,000 FTE).⁵
- Transportation incidents were the most common fatal event, with tractors and ATV/UTVs as the primary vehicle sources.⁵
