

# NATIONAL FARM SAFETY AND HEALTH WEEK

## SEPTEMBER 20-26, 2020

The 2018 data for the U.S. Bureau of Labor Statistics indicates that the agricultural sector is still the most dangerous in America with 574 fatalities, or an equivalent of 23.4 deaths per 100,000 workers.

Fall harvest time can be one of the busiest and most dangerous seasons of the year for the agriculture industry. For this reason, the third week of September has been recognized as National Farm Safety and Health Week.
