Agritourism is growing in popularity across the nation. Protecting the safety of farm visitors is important for both the visitors and for farms hosting these events.

This project was funded in part by UMASH through a cooperative agreement from NIOSH/CDC, U54OH010170 and by the MDH through a cooperative agreement from CSTE/CDC 5U38OT000143. The contents are solely the responsibility of the authors and do not necessarily represent the official views of CDC.
DON’T SPREAD GERMS - WASH YOUR HANDS!

6 Steps to Flush Germs Down the Drain

1. WET
2. SOAP
3. WASH FOR 20 SECONDS
4. RINSE
5. DRY
6. TURN OFF WATER WITH PAPER TOWEL

DON’T TOUCH YOUR MOUTH
That’s how germs get in your body and make you sick.

KEEP FOOD AND DRINK OUT OF ANIMAL AREAS
Including sippy cups, bottles, and pacifiers.

CLOTHING AND SHOES
Change your clothes and leave shoes at the door when you get home. Germs can “hitch a ride” on clothing and shoes.

Kids under five, senior citizens, pregnant women and those with underlying medical conditions are at higher risk for more serious infections.
