

## Improving the safety and health of agricultural workers and families through research, education and prevention.

UMASH is a collaboration of the University of Minnesota School of Public Health and College of Veterinary Medicine, the National Farm Medicine Center of the Marshfield Clinic with the Migrant Clinicians Network, and the Minnesota Department of Health.

## Research • Education • Prevention

### UMASH currently has projects related to:

- Health and safety in the pork and dairy industries,
- Evaluation and prevention of zoonotic diseases in agricultural workers,
- Immigrant worker health and safety,
- Developing partnerships to enhance worker health while maintaining productivity in an evolving agriculture industry.

*The Upper Midwest Agricultural Safety and Health Center is funded by a cooperative agreement from the National Institute of Occupational Safety and Health.*

### One Health in Agricultural Safety and Health

UMASH embraces a **One Health** philosophy that recognizes the connections between **human, animal, and environmental health** when addressing occupational health and safety issues in agriculture.

## Engagement

UMASH seeks to connect with people and organizations to identify needs, challenges, and opportunities in agricultural health and safety.

Email or call us at:  
umash@umn.edu or 612-625-8836

## Research Opportunities

Small grants are available through the **UMASH Pilot Projects Program** to explore new opportunities and address emerging issues related to the health and safety of agricultural workers and their families.
