Year: 2008 to 2017
Net farm income, a broad measure of profits, is forecast to decrease $4.3 billion (6.7 percent) from 2017 to $59.5 billion in 2018, \textit{the lowest net farm income level in nominal dollar terms since 2006}. Net cash farm income is forecast to decrease $5.0 billion (5.1 percent) to $91.9 billion, the lowest level since 2009. In \textit{inflation-adjusted (real) 2018 dollars}, net farm income is forecast to decline $5.4 billion (8.3 percent) from 2017 and, if realized, \textit{would be the lowest real-dollar level since 2002}. Real net cash farm income is forecast to decline $6.7 billion (6.8 percent) from 2017, which would be the \textit{lowest real-dollar level since 2009}. Net cash farm income includes cash receipts from farming as well as farm-related
What’s So Hard about Farming??
