

Childhood Agricultural Injuries (U.S.)

2020 Fact Sheet

60% Of household youth were *not* working when they were injured in agriculture.

Population at Risk

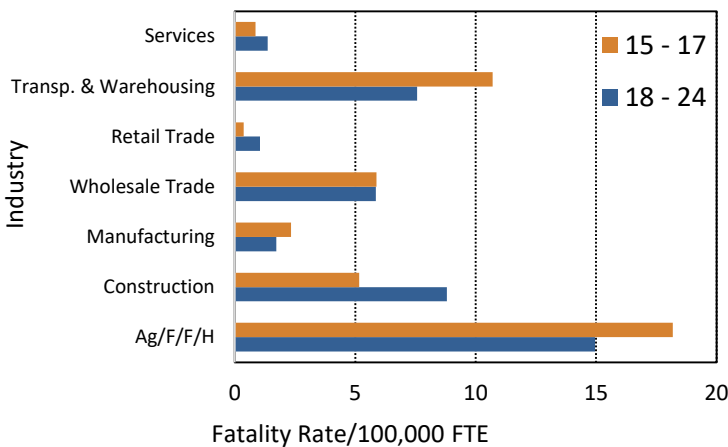

Farms	<ul style="list-style-type: none"> In 2018, there were approximately 2.03 million farms in the United States.¹
Children	<ul style="list-style-type: none"> About 893,000 youth lived on farms in 2014 and more than half (51%) worked on their farm.² More than 265,600 non-resident youth were hired in agriculture in 2014.² Approximately 23,883,000 youth visited farms in 2014.²

Fatal Childhood Agricultural Injuries

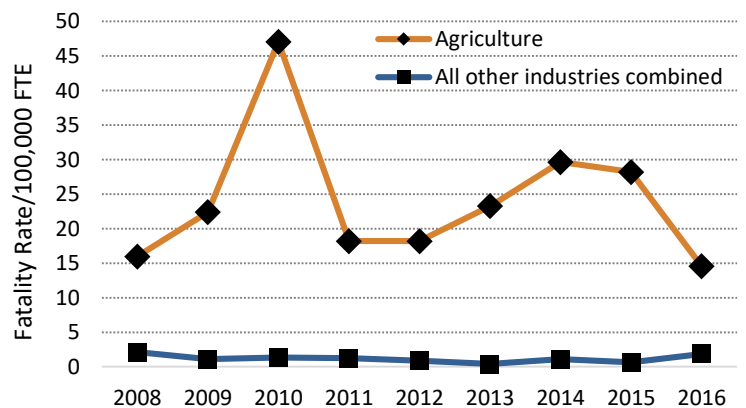

All Youth	<ul style="list-style-type: none"> A child dies in an agriculture-related incident about every 3 days.* Of the leading sources of fatalities among all youth, 47% involved transportation (including tractors), 20% involved contact with machinery, and 13% involved violent contact with animals and other humans.³ Youth under age 16 have 12 times the risk of ATV injuries compared to adults.⁴
Working Youth	<ul style="list-style-type: none"> From 2001 to 2015, 48% of all fatal injuries to young workers occurred in agriculture.⁵ Since 2009, youth worker fatalities in agriculture has exceeded all other industries combined.⁵ In 2016, young workers were 7.8 times more likely to be fatally injured in agriculture when compared to all other industries combined (14.57 per 100,000 FTE vs 1.87 per 100,000 FTE).⁵ Transportation incidents were the most common fatal event, with tractors and ATV/UTVs as the primary vehicle sources.⁵

Fatality Rates for Young Workers Across Industries

Ages 15-24, 2011-2017

Ages 15-17, 2008-2016

Ag/F/F/H = agriculture, forestry, fishing, and hunting; FTE = full-time equivalent; Transp. = transportation; Ages 15-17 unless otherwise stated

Source: Fatal injury totals were generated by NIOSH researchers with restricted access to the Bureau of Labor Statistics (BLS) Census of Fatal Occupational Injuries (CFOI) microdata; additional information at bls.gov/iif/oshcfoi1.htm⁶

* From reported 115 agriculture-related deaths annually from 1995 to 2000.³

* From estimated 11,942 injuries in 2014.⁷

† Household youth are youth who live on a farm.

NOTE: There is no central repository of childhood agricultural injuries. This fact sheet draws from the best available data.

Nonfatal Childhood Agricultural Injuries

All Youth

- Every day about 33 children are injured in agriculture-related incidents.**
- In 2014, an estimated 7,469 household[†] youth were injured on a farm and 60% of them were not working when the injury occurred.⁷
- An estimated 738 hired youth were injured on farms in 2014.⁷
- Approximately 3,735 visiting youth were injured on farms in 2014.⁷
- Vehicles were the leading source of injury for household working youth, including ATVs.⁷
- Animals were the leading source of injury for both household non-working youth and visitors.⁷

Nonfatal Injuries – All Youth

Household Youth[†] Injuries by Age

Note: Data from the Childhood Agricultural Injury Survey (CAIS) do not include injuries to contract laborers. Data are also from United States Consumer Product Safety Commission National Electronic Injury Surveillance (NEISS), 2018.
