

WHEN MOVING COWS, BE PALS!

Be **P**atient

Consider the **A**ngle of your approach

Think about your **L**ocation relative to the cow

Slow the **S**peed of your movements

HAVE PATIENCE! THE COW IS ALWAYS RIGHT.

Cows move consistently and predictably.

Know what signals your movement is giving her.

The Upper Midwest Agricultural Safety and Health Center (UMASH) is funded by a cooperative agreement from the National Institute of Occupational Safety and Health (NIOSH).
