

# Youth Attitudes about Ag Safety

At the 2021 FFA convention, we surveyed **1,336 students** from across the nation.

**Most youth recognize that farms are hazardous and are communicating in potentially dangerous situations.**

Farms are a hazardous workplace and can be a risk to my health and safety.

When doing a new farm task, I ask questions to make sure I understand the job.

**When seeing risky behavior on the farm, youth said they would:**

Speak Up  
**84%**

Continue to Observe  
**12%**

Stay Quiet  
**4%**

A higher percentage of boys than girls said they would stay quiet.
