NATIONAL FARM SAFETY & HEALTH WEEK

Join us on September 15 - 21!

2024 National Farm Safety and Health Week

US Ag Centers Promotional Toolkit

September 15-21, 2024

- **Monday (9/16):** Equipment & Rural Roadway Safety
- **Tuesday (9/17):** Health and Wellness
- **Wednesday (9/18):** Generations of Farming
- **Thursday (9/19):** Confined Spaces
- **Friday (9/20):** Reporting Ag Injuries

The **U.S. Agricultural Centers** collaborate to promote 2024 National Farm Safety and Health Week, especially U.S. Ag Center safety resources that fit with the daily themes of this year's campaign. The overall goals are:

1. Create cohesive, clear, and understandable messages promoting a wide range of farm safety and health topics.
2. Increase engagement on farm safety and health social media platforms.
3. Disseminate resources about farm safety and health.

This toolkit contains:

1. [Promotional guidance](#), including:
 - General communication tips
 - Directions for media engagement and posting on social media
2. [NFSHW logo, graphics, and imagery](#)
3. [Social media toolkit](#), with draft post text for teasers and each day of NFSHW
4. [Social media handles](#) for Ag Centers and additional partners
5. [A full list of relevant ag center resources](#), so you can generate your own tailored content across platforms and communications avenues

Promotional Guidance

Amplify NFSHW and the resources aligned with daily themes by leveraging your Center's outreach strategy - through social media accounts, blogs, email newsletters, or other communications venues. Consider writing a **press release** and contacting **local, state, and national media outlets** to share information about NFSHW.

To find media outlets in your area:

[Print](#) | [Radio](#) | [Television](#)

While this toolkit provides draft social media text and graphics to make promoting NFSHW and Ag Center resources easy, you may also edit the draft messaging or create your own. For this reason, we have provided a [full list of relevant ag center resources](#) at the end of this toolkit so that you can generate content specific to your audiences and goals across platforms and communication avenues.

General tips for communications

- Follow the **Media Guidelines for Agricultural Safety**:
[Downloadable PDF \(English\)](#) | [Spanish](#) | [French](#)
- **When crafting messages**: Emphasize that farm incidents are more common than expected while also **preventable and predictable**. Use the message as a “teachable moment.” Focus on the full impact of injuries and death, not just the grief caused by the incident. Include safety resources. Follow all safety protocols, including those for youth.
- **When including visuals**: Ensure photos or graphics depict appropriate farm safety protocols, even in the image's background.

Media engagement

- Remember that news moves fast - you will compete for limited space or airtime.
- Target **media outlets interested in rural/agricultural issues** - know who you will connect with at the media outlet. Get a name!
- Get a **content expert** to speak on agricultural health and safety or one of the daily themes.
- Prepare to **suggest several story ideas** that will garner broad interest. The more sensational the story, the more likely it is to be covered by media outlets. Focus on personal stories. Not all pitches will be successful, but do not let that discourage you.
- Consider **writing a letter to the editor** for a local newspaper or trade publication.
- Consider **reaching out to trade publications** for agricultural associations.
- When participating in interviews:
 - Keep your answers **short and to the point**.
 - **Prepare** your answers ahead of time.
 - **Provide instructions** on accessing resources, like the Ag Centers' YouTube channel.
 - **Mention the name** of the campaign, the organizers, and the Ag Centers.

NFSHW 2024 Social Media Toolkit

#USAgCenters | #NFSHW24 | #NECASAG

National Farm Safety and Health Week

Social media posting

- If using a resource from another organization, [tag the organization](#) in the post, if possible.
- Reshare other US Ag Center social posts and resources throughout the week.
- Posts with images tend to do best.
- Consider translating posts into languages common to your region, including Spanish.
- Use images that include a range of diverse identities.
- Make sure your social media posts are **accessible for individuals with disabilities**:
 - [Accessible Social Media](#)
 - [Creating Accessible Social Media Content](#)
- Tailor post text to specific platforms
 - **Tweets** tend to be short (≤280 characters) and do best when framed as part of a larger regional/national dialogue. They don't always include an image or link and often have 1-3 hashtags.
 - **Facebook** posts can be longer, should include only one general hashtag at most, and tend to do best with graphics that depict a story, such as infographics or pictures of individuals.
 - **Instagram** posts are centered around an image, do not include external links, and can have many hashtags.
 - **LinkedIn** posts are professional in nature, often sharing an organization's opportunities, events, or resources.
 - You may also wish to play around with Facebook and Instagram stories. Kudos to anyone who creates a TikTok video. :)
 - [Find more information on ideal social media post lengths for platforms here.](#)
- Use the hashtags #NFSHW24, #USAgCenters, #NECASAG, where appropriate throughout the campaign.
- Consider using other hashtags relevant to the topic of the post and/or your audience(s), for example:

○ #FarmSafety	○ #TeachAg
○ #CultivateSafety	○ #TractorSafety
○ #AgTeach	○ #RoadwaySafety

Monday (9/16)
Equipment & Rural Roadway Safety

Roadway crashes are a leading cause of injuries and death in agriculture. Increasing your visibility can help prevent crashes and keep the roads safe for everyone. Use this resource from Great Plains Center to check that your vehicle has the proper lighting and marking to be visible and safe on the road. <https://bit.ly/nfshw24-gpcah-ruralroads>
#NFSHW24
#FarmSafety
#USAgCenters

Using a tractor is a routine part of farm life but can strike tragedy in an instant. Rollover Protective Structures (ROPS) are 99% effective in preventing injury or death in the event of an overturn when used with a seatbelt. These 10 essential tips from the Southwest Center can help ensure you're using your tractor safely every time: <https://bit.ly/nfshw24-swag-tractor-safety>
#USAgCenters
#RoadwaySafety

Caleb was steering his tractor down a familiar hillside when he lost control. "I started sliding and I pushed the brakes, but I didn't have any traction and kept sliding sideways." The rollover protection structure (ROPS) saved his life. Read his story and find tractor safety resources to prevent your own rollover at Telling the Story Project website: <https://bit.ly/nfshw24-TTSP-caleb>
#NFSHW24

#USAgCenters

While enjoyable to drive and practical for work, it's important to remember that ATVs and UTVs are not toys. The thrill of riding can turn dangerous, even deadly, if not handled with caution. Use these ATV and UTV safety tips from the Upper Midwest Agricultural Safety and Health Center to get off-road ready: <https://bit.ly/nfshw24-umash-atv-utvsafety>
#NFSHW24
#FarmSafety
#USAgCenters

Skid steers are incredibly useful on the farm, but they can be risky to operate - their power, quick movements, and instability when loaded and limited visibility can lead to injury. When operating a skid steer remember to:
-Use seatbelt and safety bar
-Keep body inside cab with no extra riders
-Be aware of surroundings and use hearing protection.
For more safety you can see, check out comics (available in English & Spanish) from the Northeast Center. <https://bit.ly/nfshw24-nec-skidster>

Wednesday (9/18)
Generations of Farming

There are more older workers in agriculture than in any other industry, with 1 in 3 U.S. farmers over 65 years old. With age comes wisdom—and new health and safety challenges for those who continue to work and live on the farm. Check out how UMASH has partnered on innovative projects to make aging on the farm easier and safer. <https://bit.ly/nfshw24-umash-aging>
#NFSHW24
#USAgCenters

CW: suicide. Check in on your friends and family - having open and honest conversations about stress, suicide, and mental health can encourage them to seek help when needed. Home Safe Home shares a story of support during a crisis and the importance of seeking professional mental health care. Please note that this video, produced by the Southwest Center, includes sensitive content about suicide and graphic descriptions. There is also a discussion guide available to help process the content. <https://bit.ly/nfshw24-swag-homesafehome>
#NFSHW24
#USAgCenters

Mowing grass is a routine task for many youth, both on and off the farm during this season. However, it comes with risks—each year, there are approximately 10,000 child and youth lawn mower injuries. The Childhood Agricultural Safety Network (CASN) has launched the “Mow Ready?” campaign to promote safety among youth and their supervisors. Learn more about the campaign and download resources at <https://bit.ly/nfshw24-cultivatesafety-mowing>
#NFSHW24
#USAgCenters

Working on a farm can offer great benefits for youth, but it also comes with risks, especially if they're assigned tasks beyond their abilities. The newly published Hired Agricultural Youth Work Guidelines (HAYWG) from the Children's Center helps farm employers and supervisors minimize the risk of injury with valuable advice on training and supervising youth, information on regulations, and tips for managing common farm tasks safely. <https://bit.ly/nfshw24-cultivatesafety-haywg>
#NFSHW24
#USAgCenters

Farms are wonderful places for children to live and work. We all have a role in keeping youth safe while they grow up with ag. Use the top 5 safety strategies from the Children's Center to protect kids on the farm:

Thursday (9/19)

Confined Spaces

Grain bins, forage storage silos, liquid storage tanks, manure storage facilities and even transport vehicles are common confined spaces on farms. Never work alone in a confined space - having a second person can make sure you stay safe and quickly get help if something goes wrong.

Learn more from Great Plains Center about confined spaces and steps you can take to stay safe: <https://bit.ly/nfshw24-gpca-h-confinedspaces>

#NFSHW24
#USAgCenters

Characters: **441**

Harvest season is approaching! Before things get busy, take a moment to prepare your grain bins and equipment. Use these tips from the Central States Center for proper prep to help ensure health and safety for you and others and keep your grain in good condition throughout storage.

<https://bit.ly/nfshw24-cs-cash-grainbins>

#NFSHW24
#USAgCenters

Characters: **343**

Dusty environments on the farm or ranch can irritate your nose and lungs and cause long-term damage to your lungs and respiratory system. An N95 respirator filters out small particles in the air, like dust, animal bedding, and more. But be sure to choose a different respirator when working around confined spaces or gases.

More info from HICAHS in English and Spanish: <https://bit.ly/nfshw24-hicahs-respirator>

#NFSHW24
#USAgCenters

Characters: **429**

Storing, hauling, and applying manure can be dangerous without taking the right safety steps. One of the biggest hazards - exposure to manure gas - can cause long-term health problems and even death. The good news is that gas monitors can alert farmers when conditions are unsafe. UMASH has information to help you stay safe when working around manure:

<https://bit.ly/nfshw24-umash-manure>

#NFSHW24
#USAgCenters

Characters: **410**

Grain handling is a high-hazard activity, where workers can face serious injury and death. Whenever possible, don't enter a grain bin. If you must enter the bin, be sure to wear the right equipment and work in pairs to prevent grain entrapment and engulfment. Learn more from the Southeast Center about the risks and precautions to stay safe.

Friday (9/20)
Reporting Ag Injuries

The Great Lakes Center is working hard to create a new data system that will better track farmworker illness and injuries in the Illinois region with their Agricultural Safety & Health Surveillance Program. By using different data sources, they are working to create a clearer and more complete picture to help identify issues and protect farmworkers. Learn more about the project: <https://bit.ly/nfshw24-glc-farmsafetydata>
#NFSHW24
#USAgCenters

Child injuries are not 'accidents' but preventable incidents that demand our attention. Dr. Barbara Lee of the Children's Center explains that calling them "accidents" implies they couldn't be anticipated or prevented. Instead, she suggests using terms like "incident," "crash," "explosion," or "fall" to better address the root causes of these tragedies. <https://bit.ly/nfshw24-ncrahs-child-injuries-on-farms-not-accidents>
#NFSHW24
#USAgCenters

The AgInjuryNews.org database created by National Farm Medicine Center is a free tool for tracking farm-related injuries and deaths. Collecting information from near real-time agriculture related news reports, this tool helps spot trends, identify risks, and raise awareness of injuries on the farm so we can better protect farmers, farm workers and their families. <https://bit.ly/nfshw24-nfmc-aginjurynews>
#NFSHW24
#USAgCenters

Read injury prevention messages that highlight personal stories and firsthand experiences from farmers. Told in their own words, their experiences provide valuable information to learn what went wrong and how to prevent similar incidents. Visit the Telling the Story Project website to learn more: <https://bit.ly/nfshw24-TTSP>
#NFSHW24
#USAgCenters

Farming is full of uncertainties, with risks as varied as the industry itself. Researchers at the University of Florida explored how health and safety issues in agriculture, forestry, and fishing were covered in Florida news media. <https://bit.ly/nfshw24-sccahs-agmediacoverage>
#NFSHW24
#USAgCenters

In collaboration with Nebraska Extension, the Central States Center has developed a new tool to track injuries and fatalities in agriculture across the Midwest. This resource aims to improve safety and prevent incidents. Check it out here: <https://bit.ly/nfshw24-cs-cash-GIS>
