

UMASH Farm Safety Annual Planning

FEBRUARY - Safety in Confined Spaces

February isn't just a month for love - it's also a time to focus on safety, especially when it comes to confined spaces like grain bins. Grain handling is a hazardous activity, with serious risks like entrapment, respiratory issues, hearing loss, and fires. Whenever possible, do not enter a grain bin. If you must enter the bin, be sure to wear proper equipment and work in pairs. Spread some love by sharing grain bin safety resources with those you care about.
